NOTES OF GENERAL INTEREST

The amazing variety of topics treated of in the United States public documents furnishes fresh cause for wonderment in each Monthly catalogue. The present Catalogue, for May, 1908, is in no wise behind its predecessors in the varied interest of the official publications to which it supplies a guide.

It is not a wide-spread popular belief that census reports have a general and enduring popularity with the reading public, yet we have this month a fifth edition of the ponderous Agriculture volume (v. 6) of the twelfth census. There would not be a fifth edition if the four preceding editions had not been exhausted by the popular demand.

Part 1 of a summary of the Report of the commissioner of corporations on cotton exchanges has been issued.

Bulletin 94 of the Census Bureau is composed of statistics of employees, executive civil service of the United States. The total number of employees is given as 286,902, of whom a little over 10 per cent, or 29,103, are employed in Washington. If there is any kind of employee that is not employed by the Government it must be a rather rare kind. The list in Bulletin 94 is not in detail, but in groups and classes, yet such titles of employees as these are found in it: Appraisers, apprentices, architects, attorneys, bakers, botanists, chaplains, collaborators, collectors, computers, cooks, curators, domestics, detectives, editors, experts, farmers, firemen, fish culturists, gaugers, geographers, guards, internes, interpreters, janitors, keepers, librarians, laborers, melters, mates, musicians, nurses, openers, packers, pharmacists, stewards, surfmen, statisticians, storekeepers, samplers, taggers, teachers, translators, watchmen, woodworkers, and zoologists.

In the medical line we have Bulletin 43 of the Hygienic Laboratory, Public Health and Marine-Hospital Service, on the Standardization of tetanus antitoxin; Drill regulations and outlines of first aid to the injured, for the Hospital Corps of the Army; Bulletin 104 of the Animal Industry Bureau, Agriculture Department, entitled Medical milk commissions and the production of certified milk in the United States; and Bulletin 112, part 2, of the Chemistry Bureau, Agriculture Department, Food legislation during the fiscal year 1907.

Of the great Geologic atlas of the United States upon which the Geological Survey has been engaged for a quarter-century, two new folios are issued for the month: No. 156, the Elk Point folio, which includes parts of the States of South Dakota, Nebraska, and Iowa, and No. 158, Rockland, Me.

Volumes 11 and 12 of the Library of Congress print of the Journals of the Continental Congress, issued by the Manuscripts Division, are now available, bringing the record down to the close of the year 1778.

Farmers' bulletin 327 is on the Conservation of natural resources, and its author is Forester Gifford Pinchot: a subject of vital moment treated by a master hand.

Of timely interest, we have the following fresh from the press: List of works relating to the first and second banks of the United States, with chronological list of reports, etc., contained in the American state papers and in the Congressional documents; Statistical abstract of the United States, 1907.

Bulletin 74 of the Labor Bureau is on the Legal liability of employers for injuries to employees in the United States. It is stated that laws relating to such liability have been enacted in 22 foreign countries.

Bulletin 329 of the United States Geological Survey is of present economical interest, being on the Organization, equipment, and operation of the structural-materials testing laboratories at St. Louis. The pamphlet is fully illustrated and will give careful readers a clear understanding of the methods of the important work which has been done at St. Louis during the few years last past.

Bulletin 1, series of 1908, Education Bureau, has the interesting theme, On the training of persons to teach agriculture in the public schools, and it is by the eminent agricultural author, Prof. Liberty Hyde Bailey, of Cornell University.

Some hard nuts for legal minds to crack would be found in a pamphlet from the Naval War College, if it were not for the fact that the solutions are supplied in the same publication. Its title is, International law situations, with solutions and notes. Because naval officers may at times represent the Government in any part of the world, they must be well grounded in international law, and one of the means of testing and increasing their knowledge is that of submitting to them various hypothetical "situations" to which they are to furnish "solutions."

The Adjutant-General of the Army has promulgated a little volume which will be more interesting than a novel to that large part of the bone and sinew of the land which is enrolled in the National Guard of the various States and Territories. Its title is Regulations of the War Department governing the organized militia under the Constitution and laws of the United States.

GEORGE CATLIN

None of the books written by George Catlin is a public document of the United States, but the unsuccessful efforts of many prominent persons, prolonged for many years, to induce Congress to buy the hundreds of portraits of Indians painted from the life by him and the numerous objects illustrative of Indian life which he had collected during eight years' habitation among the tribes, and the

final acquirement of these collections by the National Museum after they had suffered from neglect and vicissitude for a generation, are interesting episodes described in various numbered Congressional documents (409–636; 476–374; 491–806; 511–152; 527–820; 2432–15). Mr. Donaldson's thorough account of the Catlin gallery (National Museum Report, 1885, Appendix, part 5) contains also an excellent biography of Catlin and lists of his works, both literary and artistic. Mr. Catlin never received a cent of subsidy from the Government. He maintained himself and family in Europe for many years by exhibiting his gallery of Indian paintings and curios. The proposal to buy his paintings and collections for $65,000 was once lost in Congress by a single vote in the Senate, and the failure was attributed to the jealous opposition of another artist, J. M. Stanley, who also had Indian pictures to sell. There was fierce rivalry, in the first half of the nineteenth century, between those who were exploiting the Indians for the fame and fortune of the exploiters. Schoolcraft published a note questioning the truth of Catlin's account of certain religious ceremonies among the Mandans. Catlin resented this, and brought forward in defense much corroborative evidence. He wrote Humboldt that Schoolcraft "had not the industry or courage to go within a thousand miles of the Mandans." Catlin was born in Wilkes-Barre, Pa., 1796, and died in Jersey City, 1872. For the last ten years of his life he suffered the severe disability of total deafness.

HENRY ROWE SCHOOLCRAFT

Schoolcraft's books relating to the North American Indians were found desirable for distribution by Congresses before the civil war. Mr. Schoolcraft, who was born near Albany, N. Y., 1793, and married an Indian wife at Mackinaw, 1823, began his exploring trips among the tribes as early as 1820 and began publishing his narratives in 1821, but it was not till 1847 that he got the first appropriation from Congress for the publication of his chief work. When the Treasury tap was once started it flowed freely. The first appropriation, March 3, 1847, was $5,000, and others followed in this order: January 26, 1849, $5,000; September 30, 1850, $10,000; February 27, 1851, $19,361; July 21, 1852, $28,875; March 3, 1853, $17,620; March 3, 1855, $17,200. In none of the appropriation bills does Schoolcraft's name appear. The first appropriation was made "to enable the Bureau of Indian Affairs" (then an office in the War Department) "to collect and digest such statistics and materials as may illustrate the history, present condition, and future prospects of the Indian tribes," and the succeeding appropriations were made "to continue" the same work. Notwithstanding the liberality of the subsidies, the work moved slowly, and not until July, 1852, did Congress find it needful to make a special appropriation for printing and binding the first volume. In this appropriation act the legislators gave evidence of impatience by providing that the work should be finished in five volumes and that at least one volume should be

published every year. Nevertheless the work grew to six volumes, and Schoolcraft had two more ready, but Congress would not pay for printing them. The series was peremptorily wound up by adding to the final appropriation (1855) the proviso that the money was "for the completion of the sixth and last volume," and that "said volume shall embrace all the material now or to be collected, and be completed within two years," and also that the text should be submitted to the Secretary of the Interior before publication "for revision with a view to the curtailment of all matter useless, irrelevant, or inconsistent."

In his latter years Schoolcraft was a paralytic and had no use of his hands. Typewriters were then undreamed of and stenographers were few. The volumes for which Congress paid so handsomely were mainly written and compiled, under his direction, by his second wife, a white woman. The full title of the second (which is the standard) edition of his work is: "Information respecting the history, condition, and prospects of the Indian tribes of the United States; collected and prepared under the direction of the Bureau of Indian Affairs, per act of Congress, March 3, 1847, by Henry R. Schoolcraft. Illustrated by Seth Eastman, captain, U. S. A. Published by authority of Congress. Philadelphia, Lippincott, Grambo & Co., 1853–1858. 6 vols. 4°." Volume 6 has a special title, "History of the Indian tribes of the United States." The first edition, 1851–1857, has the words "Historical and statistical" as the first of the title, which otherwise is as found in the second edition. There is also an edition entitled "Archives of aboriginal knowledge, containing all the original papers laid before Congress," etc. None of these volumes is found in the series of numbered Congressional documents.

There are conflicting opinions as to the merit of Schoolcraft's work. In a letter to Catlin, Humboldt calls it "a huge scrapbook," but no room was found in it for mention of George Catlin, a contemporary painter of and writer concerning the Indians. He also had wares to sell to Congress, and was probably looked upon as a rival. Schoolcraft published several minor works, but not under the patronage of Congress. He died in Washington, 1864.

Geological Survey.

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers, formerly Water-supply and irrigation papers; and maps, Monographs, and folios of the Geologic atlas and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least $5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

Topographic sheets. See names of places.

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About one-third of the area of the country, excluding outlying possessions, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least $3.00.

Lake Survey Office if ordered from Detroit, or to the order of U. S. Engineer Office if ordered from Buffalo. These charts may also be obtained, for cash only, at U. S. Canal Office at Sault Ste. Marie, Mich. They will be sent by express, the express charges to be paid by the purchaser on receipt of the charts, or free by mail at the purchaser's risk. Purchasers should indicate, when ordering the charts, whether they wish them sent by express or mail. The latter will be used when no choice is indicated.

The bulletins and supplements of the Lake Survey may be obtained free upon application at U. S. Lake Survey Office, Detroit, Mich., and at the engineer offices in Duluth, Milwaukee, Chicago, Grand Rapids, Cleveland, Buffalo, and Oswego.

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are, 1, Contributions to knowledge; 2, Miscellaneous collections; 3, annual reports; 4, special publications. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The volumes of Contributions and Collections are distributed only to public libraries and learned institutions in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are distributed by the Institution to libraries throughout the world, and may be had by purchase at cost from the Superintendent of Documents. The papers printed in the annual reports are published separately for free distribution. Publications should be ordered by the *serial* number. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the endorsement of a Member of Congress. Applicants for these publications are asked to state the ground of their requests, as the Institution is able to supply papers only as an aid to the research or study in which the applicant is especially interested." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.
